

Time Delay Cash Container

The Chubb Safes Time Delay Cash Container has been designed for busy retail environments where high cash turnover often presents a security and storage problem during trading hours. When the cash register drawer reaches an unacceptable high level of cash, notes can be transferred through the deposit slot to the Time Delay Cash Container. Entry to the container for removal of the contents is gained via a digital key pad operated lock which incorporates an adjustable time delay.

The unit is also available with a key lock only. For further information please contact Gunnebo Security or any of our Authorised Dealers.
